THE RISK

Because Sea-kayaking is sea activities, it carries at least some risk.

(The cause is weather and landscape)

You need know the risk below-

- A boat capsizing
- Sea kayaking is stable on the sea. However, it is sometimes happened by wave, wind and operation of oar.
- Sea sick
- You will feel a tremor on the sea, you may feel so bad and nauseous.
- Having a blister
- Because of handling a paddle, you sometimes have a blister.
- Sun burning
- Because of Ultra Violet, you will get sunburn.

- Dehydration
- Because of sweating, you are sometimes dehydration.
- Heatstroke (heat exhaustion etc)
- You sometimes get heatstroke because of outdoor activities under the sunshine.
- Hypothermia
- You sometimes get hypothermia because of coldness by soaking in the sea.
- Getting a graze, bruise and sprain
- If you touch the rock's sharp edges and fall down, you may get a graze, bruise and sprain,
- Tendonitis
- Because you will keep using your wrist, you rarely will get tendonitis.
- Dislocation fracture
- Because of boat capsizing, you rarely may get dislocation fracture.
- Losing contact lenses or anything that is not property fastened.
- Because of wind or boat capsizing, you may lose contact lenses or anything that is not property fastened. (cap, sunglasses and others)
- Crash with kayaking each other
- If the kayaking crashes with each other, it may get injured.
- Traffic on the sea
- There is a ship underway on the sea, so It will probably be affected by that.
- Fisherman
- Injuries by fishhook are rare.
- Aquatic life
- Because of stepping on that, you might be injured.
- Tetrapod
- Because of this stricter that absorb the wave, you rarely injured by catching from tetrapod.
- A fixed net
- Watch out for fixed net which may coil around your boat while you are kayaking.
- The dangerous of the beach
- There are many people (include kids) on the beach, so please be careful.
